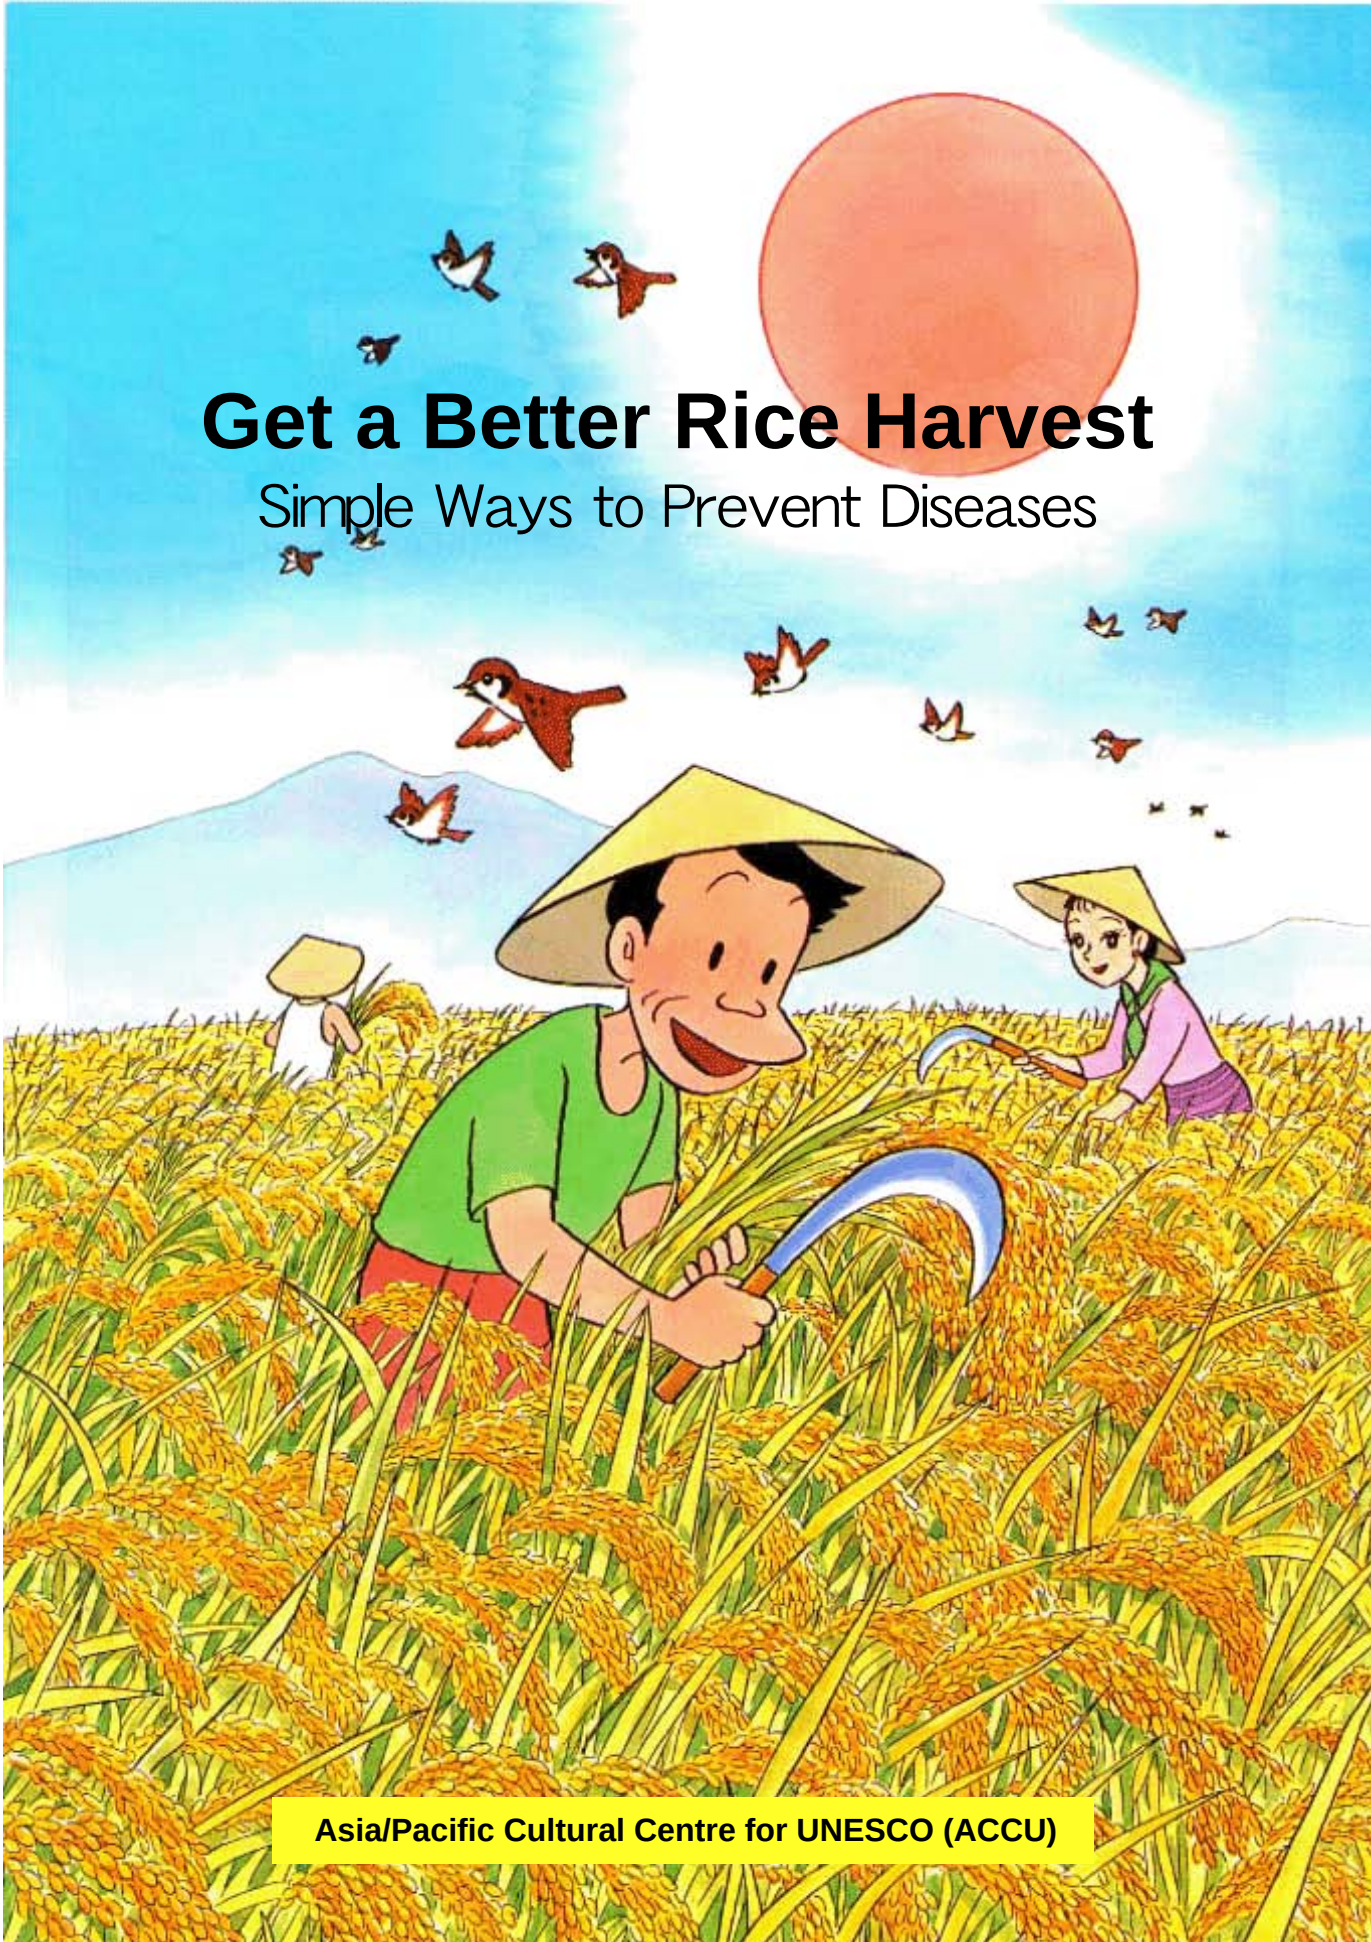
Get a Better Rice Harvest

Simple Ways to Prevent Diseases



Asia/Pacific Cultural Centre for UNESCO (ACCU)

Good Morning, Karim!
Hi, Roy. Hi, Anita. You look happy. Did you get a good harvest this season?
COOPERATIVE
Yeah, but you look gloomy. How was yours?
Terrible. Much smaller than last season. I did it the same way as before though . . . I wonder what went wrong.

Mr. Karim, maybe there's some reason for it.
Anita might be right. Can you think of any reason?
Not really. I didn't see many insects in the field.
Wait a minute! I saw some yellow leaves. I thought that was strange.
Yellow leaves? Oh, that could be rice disease. We had such unusual weather this season.
Rice disease? Do you know anything about it?
Anita does. Let's talk about it over a cup of tea.
We're home.
Oh, hello, Mr. Karim.
