TEACHING ICH SKILLS AND PRACTICES TO OUTSIDERS: Synopsis by Anyango Okwach

Presentation at the UNESCO ACCU Expert Meeting

The Approach

- Use of our experience from a community based enterprise that was set up in 2003 in a rural district in Kenya to:
  - Recollect, demonstrate, train and preserve Indigenous African Knowledge System (IKS) for food production, conservation and poverty alleviation.
  - Hence the name: CHAKRUOK Centre for His Story in Art and Development (Chakruok is a Luo word which means genesis, the beginning or foundation).
  - We target educating by revisiting community past to reconstruct the present and build the future for sustainable development.

Premise and Principle

- There cannot be sustainable development if ICH, including norms & values, are ignored or lost;
- ICH are the basic foundation (driving force) for the development of tangible heritage (physical goods) in a sustainable manner;
- ICH must be deliberately taught within and outside communities for co-existence and peaceful survival.

PERSONNEL

- Project Director identify and work with local community members: Especially women and the youth
- Educationists and researchers
- Monitoring and evaluation specialists
- NB: Work on practical issues: indigenous food production, weaving and oil extraction

Organization & Content

- Use of project and family land as demonstration centers
- Revisiting in IKS in theory and practice.
- Growing of sesame, millet, sorghum and traditional vegetables
- Weaving
- Focus Group Discussions and consensus building.
Teaching Others: Approaches

1. Through joint research, demonstration and living within others communities or centers.
2. Exchange visits: Youth Camps, developing an ICH targeted curriculum.
4. Joint writing and publications
5. Regional and international workshops

CHALLENGES

- Establishing a functional coordination center for ICH education- Changing communities perceptions and practices towards IKS;
- Building consensus on ICH and Development material to be used in educating;
- Language barrier;
- Addressing stereotypes and changing others mindsets/perceptions about local ICH;
- Mobilizing resources to support research, exchange and joint ventures;
- Dealing with an erratic power supply in the use of Internet.

ACHIEVEMENTS

- The CHAKRUOK Center is taking shape.
- We have so far demonstrated the connection between IKS and food production/sufficiency/security; have weaving products.
- Send our goods and information materials to others: Africa, USA, Canada.
- NB: Distribute CHAKUOK fliers/brochures.

LESSONS LEARNT

- Actual data is needed to make ICH education successful;
- Once households are educated in ICH and food production, they practice what learned;
- Educating own community and outsiders on ICH needs resources, commitment and
- Use of practical examples.
