

Chief, they're from the village across the river.  
They would like you to explain how our village  
has become so rich.

Welcome! Well.....  
Ten years ago, we started planting many trees on the  
mountain, in our fields and gardens. You can make use  
of these trees in many ways and they will be an investment  
to bring in more income. As the trees grow year by year,  
so does our income increase.

Now, please have a look around our village.  
This was all waste land about ten years ago.  
It's not an easy task to plant trees, but we all  
worked very hard.  
After cutting the fully-grown trees, we always  
plant saplings.
