

FOLLOW UP  
PLANS

# REFLECTIONS

- ◆ 1. A great initiative by ACCU and CEE to impart quality exchange between India and Japan. A truly wonderful and enriching experience.
- ◆ 2. Our visit to Kuki Elementary School gave a very enriching insight as to how wonderfully technology can be integrated with academics in a more fruitful way.
- ◆ 3. the Hands on learning done in the school was really great and it was great to see small children get themselves sorted between the technology and book.
- ◆ 4. Small children at Yurikago Kindergarten gave an insight that how important it is to be connected to our roots in all aspects and how discipline can be a way of life.

# ACTION PLAN

- ◆ The wonderful experiences gained at Japan can further give us a way to conduct ourselves in life and the world
- ◆ We will conduct more workshops in school and talk about how small steps can be taken to make students more environment friendly.
- ◆ Short surveys can be conducted first to understand the level of technological use in our school and based on it we can further conduct classes to make students more tech savvy.
- ◆ Project based learning will be more emphasized in the school to give real world experience to the children apart from the book knowledge.
- ◆ Exchange programs between schools from other parts of the world can be conducted to further understand the methods and pedagogy used in these schools.
