

**INTERNATIONAL EXCHANGE PROGRAMME
FOR TEACHERS FROM INDIA TO JAPAN, 2024**

What is the event that most left impression

- Any information/knowledge imparted through school teaching learning process has a great impact on a child's learning.
- May it be teaching English (as foreign language) or growing rice or detailing of a drawing, all needs a detailed plan, methodology and supporting activity for all age and multiple intelligence groups.

High school English notes on board with all the details necessary for a child to understand and memorize for future reference and use.

Pre-school experiential learning by growing rice, and then harvesting and drying giving them life skill and value too.

Drawing class in elementary school where detailing out the figures seen on board and also using the imagination of child.

For school

- Support the teachers:
 - for creating a learning environment where children are curious to learn and ready to adapt the exposures to various environments.
 - for creating resource materials that helps children for self learning and reinforcing learnt concepts.
 - For creating opportunities for expression through presentations.

Learning environment and experiential learning – Preschool – silk yarn colour dyeing

My action plan

Presentation skills – High school – science presentations

For teacher training

- Training on:
 - ✓ Planning and organising more experiential learning scopes in Early childhood stage.
 - ✓ Use of participatory approach in classroom
 - ✓ Use of appropriate technology in classroom.

Participatory approach and use of technology – elementary school – English class
