

**INTERNATIONAL EXCHANGE PROGRAMME  
FOR TEACHERS FROM INDIA TO JAPAN, 2024**

## Most memorable events of stay in Japan

- The event that left deepest impression on me was their culture of greetings and respect. The way they bow to each other, even with strangers was truly beautiful.
- Seeing students of kindergarten studying and playing in the lap of nature and their activity based learning left a lasting impression on me.
- The way students of elementary schools were distributing the midday meal, managed everything on their own without any help from adult was fantastic.
- Confidence and scientific approach of high school students.
- The way students take responsibility for cleaning their school is the perfect example of teamwork and discipline.

# Action Plan

- Encourage our students to participate in daily cleaning and maintenance of classrooms and school premises.
- Like Japanese midday meal distribution we can also assign different roles for various tasks during lunch time.
- Encourage students to practice respectful gestures, fostering culture of mutual respect and kindness.
- Take our students for outdoor study sessions in natural surroundings at least once in a week.
- Engaging our students in experiential and activity based learning.
- Involve students of class 8 in small research project based on real world scientific challenges.
