

Introduction

For 25 years, the Asia-Pacific Cultural Centre for UNESCO (ACCU) has been implementing the International Exchange Programme for Primary and Secondary School Teachers in Japan, South Korea, China, Thailand and India. In the process of planning and operating this programme, we have always been seeking out international teacher exchanges that are truly needed now through dialogue, exchange and discussion with a wide variety of relevant people, including teachers, experts and people from cooperating organisations, both in Japan and overseas. From the FY2024 programme, we are putting more effort into the follow-up of participants as well as research and analysis from a medium- to long-term perspective. We hope that, with such efforts made constantly by ACCU, we will improve our exchange programme, making it highly beneficial for everyone who has participated in or cooperated on past programmes, as well as everyone in the education sector who will be involved in future ones.

Currently, there are plenty of learning opportunities and platforms for teachers. Among these, the International Exchange Programme for Primary and Secondary School Teachers organised by ACCU stands out as one aiming to open up the way for teachers to collaborate with diverse actors and play an active role as Change Makers, based on encounters and dialogues with different people and cultures. We would suppose that teachers' views of exchange with overseas teachers and schools are diverse: some may be very much interested in interacting with them, while some others may be concerned about language barriers, and some others are not interested. Regardless of such difference in views, it is our sincere hope that this report will increase readers' interest in our programme and international exchange and stimulate them to take on new challenges.

Finally, we would like to express our sincere gratitude to all those involved for their tremendous support and cooperation in the implementation of this programme.

Programme Overview and Objectives

Program Outline Since 2001, ACCU has been implementing the International Exchange Programme for Primary and Secondary School Teachers as a project of UNESCO and the United Nations University (UNU). From 2018, the programme has been a commissioned project by the Ministry of Education, Culture, Sports, Science and Technology (MEXT) and has continued for 25 years uninterrupted. Created for teachers in Japan and overseas, this programme has been running since 2001 in South Korea, since 2002 in China, since 2015 in Thailand, and since 2016 in India, having expanded from East Asia to Southeast and South Asia with those four partner countries.

Main features of International Exchange Programme for Primary and Secondary School Teachers implemented by ACCU

Our programme is an international exchange programme for teachers, rather than a training for acquiring skills for class planning or educational practice, and as such it focuses on exchange for participants, allowing them to experience different education and culture; think anew about way of learning in the future; and create opportunities for collaboration. There are following three main features of this programme implemented by ACCU:

ACCU is implementing this programme with the vision "contribute to the realisation of a peaceful and sustainable society in which cultural diversity is duly respected". The planning and management of our programme are based on the deepening understanding of that vision and the principles of UNESCO, shared with our counterparts in South Korea, China, Thailand and India.

Programme in which teachers work together to address common issues

By sharing the concerns and issues that they face in daily teaching activities with other teachers in the same country and overseas, participants can create ideas for overcoming those issues as well as "new learning", which would not be possible if they stay within their own circle.

Construction of sustainable network

Participants can build a network with domestic and overseas teachers. There have been many cases where encounters and connections born out of this programme developed into international exchange between schools.

ACCU's vision: contribute to the realisation of a peaceful and sustainable society in which cultural diversity is duly respected Aims of the International Exchange Programme for Primary and Secondary Teachers To promote international exchange in educational institutions by teachers • To help teachers reevaluate themselves by assisting them to experience diverse people and cultures in their own country and overseas • To encourage teachers to play an active role in society as Change Makers Transformation of teachers sharing Theme for FY2024 programme "Pursuit of New Learning and Subject of Ideal Image of Teachers in the New Era" investigation and research Creating Learning Learning Network building and Gaining international insights through expansion different cultures Learning Seeing Connecting (exchange)

Figure 1: Overview of the program ©2025 Asia-Pacific Cultural Centre for UNESCO (ACCU)

Building on the uniqueness of the projects implemented by ACCU, in 2024 we planned and operated the programme with the following three objectives (Figure 1):

- To promote international exchange in educational institutions
- To help teachers reevaluate themselves by assisting

 them to experience diverse people and cultures in their own country and overseas
- 3 To encourage teachers to play an active role in society as Change Makers

Since we live in an age where the future is difficult to predict and the circumstances surrounding the educational field are constantly changing, it has become an urgent issue to reconsider (re-examine) the way school education and teachers should respond to changes. It is not easy to find answers to questions about the new ways of learning and the ideal image of teachers that will be needed in the future, but we believe that it is extremely important that teachers, whose role is to guide children who will bear the future, deepen their dialogue and exchange with people inside and outside the school and to continue to refine the idea of "learning needed now." In that context, in FY2024, we implemented the International Exchange Programme for Primary and Secondary School Teachers with the theme "Pursuit of New Learning and the Ideal Image of Teachers in the New Era".

During the programme, we conducted exchange and other activities related to "learning," "seeing" and "connecting" both online and face-to-face. After the face-to-face programme that lasted for about a week, the teachers from each country created action plans based on the learning and knowledge they gained and the network they built with other teachers (the activity that "creating" refers to). Currently, a variety of initiatives in the participants' respective countries are in place according to those action plans. While each programme focuses on bilateral exchange, the action plans allow participants from the five countries to share their results and knowledge with each other, transcending the boundaries of the programmes. The contents of the action plans are wide-ranging, including exchange with schools in the country the participants visited and organizing international exchange events in the local community.

In FY2024, we also started putting more effort into aging analysis and follow-up after the programme. We will observe changes in participants' actions before, during and after the programme, their international exchange practice in educational settings, and initiatives as Change Makers inside and outside schools over the medium to long term and will use the findings to improve the quality of future programmes. Moreover, we will widely disseminate the participants' post-programme exchange activities and expand the circle of programme-results dissemination and that of teacher exchange further beyond the programme participants.

 $\frac{3}{2}$

Overview of the programme and the practices by participants

The activities (only a part of them) during the programme are illustrated in light blue circles, and the teachers' practices (some examples) after participating in the programme are described in green circles. The exchanges in various places have led to international exchanges in the educational field and in the local community, as well as to changes in the teachers themselves.

Diversity of Participants in FY2024 (region and school type)

ACCU implements its programmes for teachers with diverse backgrounds without limiting participants by school subject, position, school type, or region where they live. This is one of the features of the programmes implemented by the ACCU, which also function as a platform for building a wide range of networks in Japan and overseas. This year, 76 Japanese teachers participated in the dispatch programme, 98 overseas teachers participated in the invitation programme, and 75 teachers participated in the educational exchange meeting. The maps etc. on this page show the diversity of the region and school types of the teachers who participated in the programme from the four exchange countries (South Korea, China, Thailand, and India) and Japan.

03

Process of Preparing for the Programme

ACCU programmes ask educational institutions throughout Japan to host teachers from overseas. Based on the partnerships with the host institutions selected via a survey of host preferences, a variety of activities are carried out every year. The general flow of the programme implementation is as follows:

Note: The following content is subject to change depending on the situation.

From April to May

Information Session (online)

ACCU will organise online information session or meeting for the teachers in the host institutions.

Until the day of hosting teachers from overseas

On-site meeting at the host institutions

ACCU staffs visit the host institutions, and discuss the activities on the day of hosting the teachers from overseas etc.

During the programme

Interaction and exchange with teachers from overseas

After the programme

Schools and teachers within and beyond Japan have been exchanging with schools and teachers overseas Adding to our programme activities, some schools have started exchanges with overseas schools independently as a result of participating in our programme. Moreover, there was a comment stating, "We deepened our dialogues with staff and local people", which is progress that is expected to lead to further collaboration in the future.

Comments from the Host Institutions and the Co-operators

(Invitation Programme for Teachers from India)

Kuki East Elementary School:

I feel very honoured to have been involved in this rare opportunity, which was like a once-in-a-lifetime experience for me in my life as a teacher. The valuable words of the Indian teachers were very stimulating, and I learned a lot from them. I hope that we will continue to encourage and inspire each other as fellow educators.

Tokyo Yurikago Kindergarten:

The exciting experience of yoga and dance with Indian teachers remains vividly in children's memory, and we hope to continue this kind of exchange in the future. After the exchange with Indian teachers, the children had the opportunity to experience magic tricks performed by an Indian magician and to learn about Indian vegetables from people living in India, so for the children, it was a year with stimulating opportunities to learn about India. We have also realised that children learn more deeply when first-hand experiences are linked to everyday experiences of researching (using picture books, for example) the things that interest them. We would like to continue to create opportunities for this kind of exchange in the future by actively incorporating the experiences of learning directly about different countries and cultures, such as India, into our children's education.

Saitama Prefectural Koshigaya Kita High School:

The students' active attempts to communicate with Indian teachers made me realise once again the value of face-to-face interactions. I would think that this exchange was a good opportunity to further motivate the students to learn. During the time for teachers exchange, the Indian teachers explained in detail about the situation of schools in India and the position of teachers and others, so it was a good learning opportunity for us as teachers.

[Invitation Programme for Teachers from Thailand] Nigata Junior High School:

Our school has students of Thai, Chinese and Brazilian nationalities, but we had not been doing any activities or learning about international exchange or multicultural coexistence. The reason for that was that those students of foreign nationality had their everyday conversations in Japanese, while we had not encountered any situations that required cross-cultural understanding. However, in this programme, we had teachers visiting from Thailand, and they interacted with our students in a very kind way, which eased their initial nervousness, and it became a very pleasant exchange. As a result of this visit, our students' interest and curiosity about the country of Thailand and other foreign countries seemed to have increased. I used to think that international exchange was a rather difficult topic to deal with, but once I worked on it for this programme, I came to think that it is very exciting and has a high educational effect.

Zao Primary School:

The thing that struck me most during the exchange was the warmth and natural kindness with which the Thai participants interacted with us. Thanks to that, the children of all grades wanted to play with and talk to the Thai teachers not only during class but also during break times, and we had a natural and comfortable exchange. I would think that we achieved our goal in participating in this programme, which was to have a natural and comfortable exchange.

Dr. Takayoshi MAKI, Associated Professor, Graduate School of Humanities and Social Sciences, Hiroshima University:

I was much impressed by the successful exchange event with the smiles of the Japanese and Thai teachers, and the detailed support and care of the staffs at the Asia-Pacific Cultural Centre for UNESCO. The radio exercise, Higashi-Hiroshima Ondo (Higashi-Hiroshima City folk song for dance), and especially the campus orienteering were new activities for my students, and they would be able to use them as extracurricular activities at their own workplaces (such as teacher training schools) after returning to their home countries. In addition, by giving the students the opportunity to take charge of the campus

orienteering, they gained experience in planning and managing events and had a sense of achievement when it was completed. I was able to get to know the teachers from the Thai and Japanese schools, and I learned a lot from the staffs at the Asia-Pacific Cultural Centre for UNESCO, including the careful preparation and organisation of this exchange event, the icebreaking activity of introducing a radio exercise, and how to run workshops.

[Invitation Programme for Teachers from the People's Republic of China]

Yashio City Hachijo Junior High School:

As a teacher, I felt that it was a very good opportunity to share and empathise with the challenges and worries that teachers face regardless of nationality, such as educational counselling, student guidance, special needs education and dealing with parents and guardians. I would think that it was a great gain to learn about some of the systems and ways of thinking that were different from ours (those of our school and/or Japan), such as the ICT environment and initiatives that help students improve their academic abilities.

Kamisu City Ikisu Elemenntary School:

More teachers and children than ever are now interested in Chinese history, culture, language and education. Following the exchange, we had a moral education class with the topic of international understanding. In that class, one of the pupils said, after mentioning the differences between Japanese and Chinese culture that the Chinese teachers had taught them, "Even though there are differences, each of the cultures has its own strengths". Also, responding to the questions from the Chinese teachers at the teachers exchange was a good opportunity for us to think again about Japan and our school's education systems.

[Invitation Programme for Teachers from the Republic of Korea]

Oji North Compulsory Education School:

This visit was a valuable opportunity for us as teachers to deepen our understanding of different cultures. The enthusiasm of the South Korean teachers made us broaden our horizons, providing many hints that we can apply in our future educational activities. I also feel that the exchange with the South Korean teachers was a very meaningful experience for the children in terms of developing their international sensibilities. I am confident that exchanges between Japanese and South Korean educators can contribute to the development of education in both countries.

Kobe Municipal Shinkotachibana High School:

The exchange of opinions between our teachers and the visiting teachers was particularly impressive to me because it allowed us to share our education-related thoughts and issues. Even though we are neighbouring countries, some of our students were found to have prejudiced ideas about South Korea due to the cultural differences. However, the enthusiastic efforts the visiting teachers made in the classes and dialogues deepened the exchange and had a stronger impact on those students' minds than the superficial information obtained through the internet and other media. As a result, they changed their prejudiced views and started to make comments, such as "I want to know more", "I would like to go there", and "I'm interested in participating in more exchange activities".

Efforts and Educational Practices of the Participants after the Programme

The encounters in each programme have developed into a variety of international exchange activities in different locations. The following are the efforts of the participants after the FY2023 and FY2024 programmes.

Mr Tadashi MIHARA (Kaichi Junior and Senior High School)

Our school has formed a sister school partnership with Chilwon High School in Gyeongsangnam-do, South Korea, which we visited as part of the South Korean government's 2024 Invitation Programme for Teachers from Japan (the South Korean dispatch programme). At the end of the year, the teachers with some of their students revisited Chilwon High School where they engaged in presentations on Japan and South Korea's respective SDGs activities and research, a workshop of making traditional Japanese crafts (kimekomi-style kimono wooden dolls of Iwatsuki city), and the experience of playing traditional Korean games. In 2025, we will start an exciting exchange programme that will put a greater focus on cultural exchange, class participation and homestays, on top of sightseeing activities, so that the students and teachers would make lifelong friends.

Ms Natsuko SAKAGUCHI (Tokyo Kodaira Special Needs School, Musashi branch) _

We held an online exchange event with students in the Busan SungWoo School, which I visited as part of the 2024 Invitation Programme for Japanese Teachers, and students from the junior high school division of the Tokyo Kodaira Special Needs School. At the event, the children had a fun time together enjoying activities, such as dancing and giving each other quizzes, while showing a positive interest in each other.

Ms Taeko MARUYAMA (Nagano School for the Blind)

Online exchanges with the Seoul National School for the Blind began as a result of the relationship formed through the 2024 dispatch programme in South Korea. In the online exchanges, we carried out various activities, such as self-introductions, introduction to our school, and explanations of the Japanese Koto harp as well as its performances. In January 2025, several of our school's teachers visited the Seoul school in person where they observed the school's facilities and educational activities and exchanged opinions with the teachers there. In the future, we would like to continue to actively promote exchanges between teachers, in addition to those between students.

Ms Ryoko ISHIKUMA (Nagasaki City Doinokubi Junior High School)

As an extension of the 2024 Invitation Programme for Teachers from Thailand, Doinokubi Junior High School first-year students exchanged greeting cards with Sirindhorn School first year students in Thailand. Ms Eiw, a teacher at that Thai school is one of the Thai teachers with which we became acquainted at the Japan-Thailand Educational Exchange Meeting held at Hiroshima University. This activity was successful with positive feedback, such as "The students communicated with one another feeling the presence of the recipient", "They learned about Thai and Japanese cultures and increased interest in them", and "They increased motivation to use English". There also were suggestions for further improvement, including "More emphasis should be put on the reflection", "We should create a system for continuous and developmental exchange", and "Other methods of exchange should be tested, besides sending greeting cards".

Mr Jun TABEI (Tachikawa Daihachi Elementary School, Tokyo) _

We met Ms Meenakshi Khushu at the Japan-India teacher exchange meeting and have been engaged in online exchanges with the school she works for (Shree Vasishtha Vidhyalaya). In February 2025, the fifth-grade students of our school and their counterparts at the Indian school introduced traditional games from their own countries to each other. The Japanese children introduced and demonstrated how to play the Japanese games of koma (top) and kendama (duce ball). The Indian children taught us Indian games and yoga, and although there were some yoga poses that the Japanese children struggled to make, all of us enjoyed the exchange throughout. We hope to continue this kind of exchange in the future and use it as a way to help children understand and communicate with people from different cultures.

Japan-India international online exchange organised by the schools in Tokyo and Delhi

Mr Jun TAKESHIMA (Okayama City SONAN Junior High School)

Following on from the 2023 Thailand-Japan International Educational Exchange Programme, Invitation Programme for Primary and Secondary School Teachers from Japan (the Thai dispatch programme), we have been promoting exchanges between Hokkaido Oketo High School (the institution to which the participants in the programme belong), Sung Noen School in Nakhon Ratchasima Province, and our school. After returning from Thailand, the students of each school developed activities, such as introducing their own schools online, and in 2024 we concluded a three-school educational exchange agreement. In January of this year, we held an event for the early celebration of the first anniversary of the online three-school educational exchange agreement, and we plan to continue to promote exchanges in the future.

Group photo of the early celebration of the first anniversary of the Japan-Thailand three-school educational exchange agreement

Ms Makaporn KHANPLOO (Kanlayanawat School) ____

After participating in the 2024 Invitation Programme for Teachers from Thailand, Ms Makaporn held an exhibition at her school based on her experiences in Japan, which was highly evaluated by the Ministry of Education of Thailand and was awarded the first prize. The display included figures and models made with recycled paper, inspired by the Japanese anime Gundam and the Hiroshima Peace Memorial Museum that she visited on 10 November. She also exchanged New Year's cards with Zao Primary School, hoping that this will not just be a school-to-school exchange, but would develop into an exchange between children in the future.

Display leading to education for international understanding in the school in Thailand

Mr Shin NONOYAMA (Aichi Prefectural Obu High School)

Using the learning and experience gained from the 2024 Thailand-Japan International Educational Exchange Programme, he immediately gave a special world history lesson to the second-year students (Class 3 and 4) at the high school where he works. Mr Nonoyama is a top leader in promoting proactive and interactive lessons at his school, and has also received several visits from people observing his lessons from within and outside Aichi prefecture. His approach, which linked the students' world history research activities to the theme of "Learning about Multicultural Coexistence from Thailand", was organised into four parts in March 2025: (1) introduction and deciding on the theme used in the lessons, (2) research activities, (3) research activities and summary, and (4) presentation and reflection. The introduction was based on learning materials that would arouse interest in Thailand (photos taken by the teacher while jogging in the morning in Thailand, photos of Thai food, photos of characteristic Buddha statues that symbolise each era in Thailand, photos of Thai children of the same generation, etc., with photos that would interest the students of the class used in the lessons), and it was carried out through dialogue between the teacher and students, and between students, with questions being asked of the students at all times. In addition to the historical and geographical information in the textbooks and reference books, he also conveyed information about the culture, towns and schools in Thailand he saw during the programme, we look forward to seeing how the students perceive and deepen their understanding of Thailand in future.

"Learning about Multicultural Coexistence from Thailand" class (Inquiry-Based Learning)

Action Plan

In 2024, each participant created a personal action plan after the programme. Please visit the ACCU website to see the insights and future visions the teachers gained from the programme!

https://www.accu.or.jp/en/teachers_action_plan/

Dialogue between Teachers in South Korea and Japan – Bond between Two Schools Grown from the Encounter of Japanese and South Korean Teachers –

We conducted an interview with Ms Juhee PARK, a Korean principal, and Ms Kana ISHIBASHI, a Japanese teacher, both of whom participated in our programme from FY2023 to FY2024. The two met in July 2024 at the Invitation Programme for Japanese Teachers (South Korean dispatch programme) held in South Korea, and now they are promoting exchanges between their schools. In the interview, they talked about various topics from how they came to participate in the programme to the exchange between the two schools in which they are currently involved.

Ms Juhee PARK. Principal, Yongnam Elementary School

(participated in the 2023-2024 Invitation Programme for Teachers from the Republic of

The significance of international exchange, by Ms Park

In school education, international exchange is a way of putting Global Citizenship Education (GCED) into practice. Through international exchange, teachers and school staffs can come into contact with different cultures and new teaching methods and gain the ability to view problems from diverse and new perspectives. It is also possible to expand networks and gain opportunities for further collaborations as part of GCED. Above all, I think that international exchange is the best way to show pupils and students a wider world.

Ms Kana ISHIBASHI (Ms Ishibashi): What made you decide to participate in the Invitation Programme for Teachers from the Republic of Korea, principal Park?

Ms Juhee PARK (Ms Park): I first knew about this programme from the official documents sent to the school where I was working then. I had never been to Japan before, but I was interested in Japanese education and culture, and as a principal, I was also interested in international exchange. I decided to take part in the programme because I wanted to show children a wider world through educational practices, and in particular, I wanted them to learn about Japan. How about you, Ms Ishibashi?

Ms Ishibashi: I had never been to South Korea before, either, but I had always been interested in South Korean culture. When I heard about the programme to send teachers to South Korea, I decided to take part because it would be a great opportunity to visit South Korea and learn more about the education, culture, teachers and children in South Korea. Another reason for my decision was that I thought it was a plus for both Japan and South Korea, two

Ms Kana ISHIBASHI. Teacher, Fukuyama City Yamate Elementary School

(participated in the 2024 Invitation Programme or Japanese Teachers)

The significance of international exchange, by Ms Ishibashi

I think that a significant benefit of international exchange is that it allows us to expand the circle of people who appreciate the appeal of each other's countries. As teachers, we are in a position where we can interact with many people and put our educational activities into practice and further development, and I think that we are expected to play a role as a bridge to the world. There are many ways for teachers to experience the appeal of different countries around the world, not just the country in which they live. Among them, I think that international exchange between teachers is one of the most essential ones because it would be very meaningful for us to exchange with other teachers from a different country deepening their understanding of the country, its education, culture, traditions and so on, and to try and communicate what they can do as a bridge between the two countries. Once one starts communicating, we would surely move forward, and the awareness and feelings of the people around us would gradually change. In time, those people may be inspired by us and spread my ideas to other people. In this way, I would think, the circle of international understanding education would expand further.

neighbouring countries, to learn more about each other and apply what we learn to our educational practices.

Ms Ishibashi: I still remember clearly the first time I met principal Park in July. I happened to be sitting next to her at a joint activity for Japanese and South Korean teachers held in Busan during the programme. I was very nervous because I couldn't speak Korean, but principal Park used a translation app on her smartphone and spoke to me with a lovely smile, so I was able to relax and enjoy the exchange.

Ms Park: Ms Ishibashi also treated me warmly, and I was very attracted to her personality. She was full of curiosity and answered my questions with sincerity. From such a personality, I got the impression that she must be a good teacher.

Ms Ishibashi: What I remember in particular is that after the joint activities, she came to me and said, "I'm so happy to have met you, Ms Ishibashi." It made me so happy, because I felt the same way about principal Park.

Ms Park: After that day, we started exchanging messages online, and you proposed an exchange between Yongnam Elementary School and Yamate Elementary School, didn't you?

Ms Ishibashi: I felt a very warm feeling when I went to South Korea and spoke directly with the teachers and children there. I wanted to share this warm feeling with the other teachers and children at Yamate Elementary School after I returned to Japan, rather than keeping it to myself. So after I returned, I discussed the matter with the principal of my school and proposed an exchange plan with Yongnam Elementary School to principal Park.

Ms Park: When I spoke to the teachers at Yongnam Elementary School about the international exchange plan with Yamate Elementary School, some of them said, "We'd love to do it!" As the principal, I was very happy to see that the teachers at our school were so enthusiastic about the exchange. I am very grateful to Ms Ishibashi for giving us the opportunity to exchange with a Japanese school.

Ms Ishibashi: When we first started our exchange with principal Park's school, we set a theme for the children of each school, "We love Korea" for the Yamate Elementary School and "We love Japan" for the Yongnam Elementary School and asked them to tell the other school's children about the things they liked about the country. Sending each other videos in English at the start of the exchange was a great idea for easing the language barrier between them. In the videos, the children at Yamate Elementary School introduced their favourite Korean foods and idols.

Ms Park: The exchange with Yamate Elementary School was the first international exchange for Yongnam Elementary School. Given that context and the language barrier, it was truly good that we started with an exchange of videos. The video that Yongnam Elementary School sent to Yamate Elementary School was made by the teacher in charge of international exchange at our school, together with the children in the 5th grade. The video included clips of the children playing the theme song from a Japanese anime with kalimba, and dancing to a famous Japanese song.

Ms Ishibashi: After exchanging the videos with Yongnam Elementary School, the children at Yamate Elementary School said repeatedly that they want to exchange more with children at Yongnam Elementary School. Seeing this, other teachers suggested that we should form a club, and so we set up the Yongnam-Yamate International Exchange Club, and made a dance video and sent it to Yongnam Elementary School.

Ms Park: So that was how that club was formed. I would like to discuss with the teachers in charge of international exchange at my school how we, too, can improve our international exchange activities, such as creating a club like the one at your school.

Ms Ishibashi: We also sent each other videos introducing our local

Ms Park: Yes, we did. Yamate Elementary School sent us a video introducing Fukuyama city.

Ms Ishibashi: We were also very happy to receive a wonderful video from the Yongnam Elementary School introducing tourist attractions in Tongyeong. Your school also sent us photos, which we displayed in the school library, and we held an event highlighting the charm of South Korea.

Ms Ishibashi: As our video exchange has continued over a number of times, have you noticed any changes in the teachers or children at the Yongnam Elementary School since you first started international exchange with the Yamate Elementary School?

Ms Park: Yes, there have been changes. First of all, "international exchange" has been added to our official school duties. Until 2024, it was carried out as one of the activities of the volunteer teachers, so this was a big change for the school. This change would not have been brought about if it were not for Ms Ishibashi's proposal, so I am very grateful for that. Also, the fact that the children at our school have become interested in international exchange through their exposure to Japanese culture is also a positive change for the school and one of the joys I have had from this programme.

Ms Ishibashi: The children at Yamate Elementary School have also become more interested in South Korea and international exchange through this exchange.

Ms Park: I'm very happy to hear that. I would like to continue our international exchange activities and hope that our exchange will develop into in-person meetings between the children of Yamate Elementary School and Yongnam Elementary School.

Ms Ishibashi: I, too, would like to see a continuous exchange between my school and Yongnam Elementary School. And in the future, I would also like to try other forms of exchange, not just videos, such as online real-time exchange and face-to-face exchange.

Ms Park: It would be wonderful to have a real-time online exchange, where the children could perform dances and sing songs for each other.

Ms Ishibashi: That would be great. Let's continue to think about how to promote sustainable exchange together!

Messages from Ms Park and Ms Ishibashi - To teachers considering participating in the International Exchange Programme for Teachers -

Ms Park: Everyone who wants to participate in future programmes! The International Exchange Programme for Primary and Secondary School Teachers is the first step towards understanding diverse cultures and developing valuable bonds with new people. Please take the first step towards a wider world with an open mind and a challenging spirit. The small first step will be a great opportunity for you to interact with a different culture and society. I believe that our world will be more beautiful when we learn to respect other cultures transcending differences through new experiences.

Ms Ishibashi: Everyone has their own reasons for being interested in foreign countries and international exchanges. Above all. I would like you to cherish the positive feeling of liking something, being interested in and curious about something, and wanting to do something. You would probably need courage and determination to take the first step, but once you have taken it, things around you will start to change, and you will be able to move forward towards your goal. In the process of your exchange, you will have a variety of encounters, your horizons will broaden, and I believe that your valuable experiences will have a positive effect on your everyday educational activities and your life as a whole. Then, with the passion and curiosity in your heart, why don't you take the first step?

Evaluation of the FY2024 Programme

In order to re-examine the significance of our programme and improve it further for the benefit of participants, we invited Prof Aki YONEHARA as a programme advisor, who then helped the programme in many aspects, for example, programme planning, research and analysis. In the following, based on the research and analysis of our programme by Prof Yonehara, we present the thoughts of the participated teachers on this fiscal year's theme and the results of this programme shown by the questionnaire survey.

Prof Aki YONEHARA

Professor, Department of Sociology, Toyo University

Prof Yonehara specialises in comparative education policy, evaluation studies, international cooperation, human development, social statistics and surveys.

She applies her expertise in evaluation research to initiatives related to human development, such as the SDGs and ESD, while currently serving as vice president and secretary general of the Japan Evaluation Society (JES) and as a certified advanced social researcher. Her written works include co-authoring SDGs jidai no hyōka: Kachi wo hikidashi, henyō wo unagasu itonami (lit. Evaluation in the age of SDGs: Activities to extract values and promote transformation. Tsukuba shobō, 2022).

As a framework for evaluating the programme, we introduced the programme evaluation method this fiscal year (Yamatani et al., 2020). Programme evaluation is a comprehensive evaluation method that consists of five evaluation areas: needs, theory, process, outcome, and efficiency (Figure 1). Unlike ex-post evaluation that focuses only on results, a programme evaluation allows us to conduct an evaluation from a comprehensive perspective that does not turn the process into a black box.

Assessment of Program Cost and Efficiency

Assessment of Program Outcome/Impact

Assessment of Program Process and Implementation

Assessment of Program Design and Theory

Assessment of Need for the Program

Figure 1: Five areas of a programme evaluation

One of the characteristics of a programme evaluation is that it constructs a logic model at the theory evaluation stage. In the case of our programme, a logic model was constructed through collaboration between ACCU staff members and the author as shown on page 16. This logic model shows the vision of the project, the specific activities to achieve that vision, and the indicators to visualise the results of these activities.

Why there is a need for a teacher programme that emphasises dialogues and diversity

Since there are many incidents in various regions around the world shaking the foundations of a peaceful society, there is a growing need for long-term efforts for human development in order to realise a peaceful world through dialogue and mutual recognition of diversity. Teachers are important stakeholders in this context. This is particularly true of teachers involved in primary and secondary education because they are in a position to act as a hub in their local area by connecting children, parents, and local residents and promoting dialogue between them. On the other hand, schoolteachers tend to spend most of their time in a homogenous environment and have few opportunities to meet people from diverse backgrounds. The experience of encountering and interacting with diversity through this exchange programme will provide teachers with hints for understanding diversity in their educational settings and will also be an opportunity for teachers to cultivate qualities to be Change Makers.

Logic model of this programme

Super goal (ACCU's mission = vision for the overall programmes)

Realise a peaceful and sustainable society where diverse cultures are respected

Upper-level outcomes (vision for the programme)

- · Teachers promote international exchange in their educational institutes.
- Teachers reevaluate themselves from a global perspective.
- Teachers play an active role as Change Makers.

Intermediate outcomes

(specific outcomes for the programme = qualities to be *Change Makers*)

(1) High sensitivity to diversity

Long-term vision

Medium-term plan (2024–)

- (2) The ability to engage in deep dialogue based on understanding of different cultures and others
- → The programme provides opportunities for cultivating the qualities of (1) and (2) in participated teachers.

Activities (contents of the programme = activities to achieve intermediate outcomes)

Theme for FY2024: Co-creation of the Vison for New Learning and the Ideal Image of Teachers in the New Era

Let's create new styles of learning and teaching unknown yet by sharing diverse perspectives, experiences and concerns.

[Goals and evaluation indicators : Changes expected in participants]

- 1)Increased interest in different people → Questionnaire questions 7 and 8
- 2)Increased knowledge of different people → Questionnaire questions 9 and 10
- 3)Increased interest in international exchange and understanding → Questionnaire questions 11, 12
- 4)Expanded network with Japanese teachers → Questionnaire question 13(1)
- 5)Expanded network with domestic teachers → Questionnaire question 13(2)
- 6)Able to apply what a participant has learnt from this programme to their teaching activities
- → Questionnaire question 13(3)
- 7) Willingness to share what a participant has learned from this programme with their colleagues
- → Questionnaire question 13(4)
- 8) Willingness to take a lead in planning and promoting international exchange programmes
- → Questionnaire question 13(5)
- 9)Co-creation of ideas about the new types of learning and images of teachers in the new era
- →Open-end question

*Please refer to the [Questionnaire of the FY2024 programme] on page 22 for the survey questions.

16

In accordance with this logic model, the evaluation with mixed methods were conducted, which employed both quantitative and qualitative data as presented below. The results of the analyses will be outlined in following three sections, I, II and III. The data were collected from the 24 participants in the invitation programmes from India and Thailand (12 teachers from each country). The programme content for the Japanese teacher dispatch programmes differed greatly depending on the host institution, so they were not included in the analysis.

I. Quantitative evaluation based on questionnaire II. Qualitative evaluation based on open-end questions III. Summary

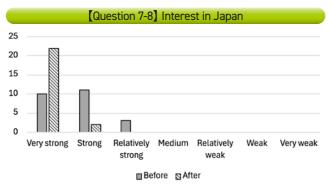

I. Quantitative evaluation based on questionnaire

As part of the evaluation activities for the programme, a questionnaire survey was conducted at the end of it (the questionnaire attached). In this questionnaire, there are questions designed to evaluate the goals in the activity part of the above logic model (questions 7-13), which are the evaluation indicators for the programme. In the following, the results of the statistical analyses of those question items will be examined.

I-1. Increase and deepening of interest and knowledge

The following figures show the results of the analyses of how (1) interest in Japan, (2) knowledge of Japanese education, and (3) interest in international exchange and understanding changed before and after the programme. The results of the t-test show that all of those showed a statistically significant increase, which verifies the positive effect of the programme.

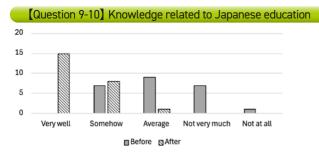

(1) Changes in interest in Japan (7-point scale)

	After	Before
Mean	6.92	6.29
(Variation)	0.63	
Variance	0.08	0.48
Observations	24.00	24.00
Degree of freedom	23.00	
t Stat	4.73	
P(T<=t) two-tail	0.00	

Note: Paired-sample t-test by Excel ver. 2412.

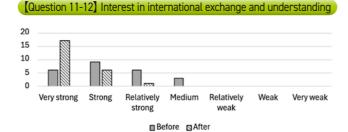

(2) Change in knowledge of Japanese education (five-point scale)

	After	Before
Mean	4.58	2.92
(Variation)	1.67	
Variance	0.34	0.78
Observations	24.00	24.00
Degree of freedom	23.00	
t Stat	11.63	
P(T<=t) two-tail	0.00	

Note: Paired-sample t-test by Excel ver. 2412.

(3) Change in interest in international exchange and international understanding (seven-point scale)

	After	Before
Mean	6.67	5.75
(Variation)	0.92	
Variance	0.32	0.98
Observations	24.00	24.00
Degree of freedom	23.00	
t Stat	6.26	
P(T<=t) two-tail	0.00	

ote: Paired-sample t-test by Excel ver. 2412.

These results revealed that the goals 1 to 3 articulated in the activities in the logic model were achieved. In other words, it can be said that through this programme many of the participated teachers increased their interest in people different from themselves, deepened their knowledge of them, and enhanced their interest in international exchange and understanding.

I-2. Changes in awareness brought about by this programme

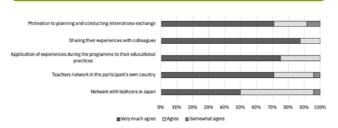

Next, we examined the changes in the participants' awareness brought about by this programme, and the following trends were identified.

Question 13 (1)-(5) (seven-point scale)

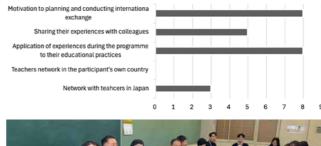

- (1) Through this programme, I feel that I have created or expanded my network with teachers in Japan.
- (2) Through this programme, I feel that I have created or expanded my network with teachers in my country.
- (3) I would like to apply what I have learnt in this programme to educational activities and practices.
- (4) I would like to share this experience with my colleagues.
- (5) I would like to set up or promote a new international exchange programme at my school/organisation.

[Question 13-1)~[5] Participants' awareness brought about by this programme

These questions were asked using a seven-point scale, but none of the participants chose any of the lower four points, from "Neither agree nor disagree (4)" down to "Not at all agree (1)", which means that all of the teachers chose either of the higher three, from "Somewhat agree (5)" to "Very much agree (7)". As is clear from the above graph, more than half of the participants responded "Very much agree" to all of the questions, so it can be said that this programme had a certain impact on changing the participants' awareness. Furthermore, as for the question "Regarding 13 (1) to (5), which of the following do you feel most strongly about?", the most common responses were "I would like to set up or promote a new international exchange programme at my school/organisation" (5), which represents their motivation for international exchange programmes, and "I would like to apply what I have learnt in this programme to educational activities and practices" (3), which expresses their interest in the application of what they gained to wider educational activities.

Which of the following do you feel most strongly about?

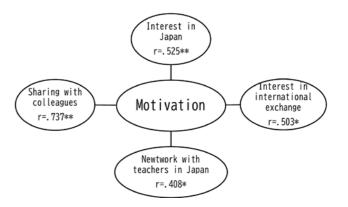

From these responses, we can see that at least by the end of the programme, the participants were motivated to apply what they had learned to their educational activities after returning to their home countries. As to whether these motivations have actually borne fruit after they returned home, and what kind of educational activities and international exchange programmes have been realised, please refer to the post-programme activities of the participants and the dialogue between Japanese and South Korean teachers introduced on the previous pages.

In response to the final question, "Do you think this exchange programme should be continued?", all of the participated teachers answered, "Very much agree" or "Agree".

I-3. Factors affecting the motivation of participated teachers

The above analysis clarified that many of the participated teachers felt most strongly "motivation for international exchange programmes" and "application to educational activities" through this programme. This being the case, we created a variable called "motivation" by synthesising those two variables and analysed the relationship between this variable and the other variables. As a result, the following relationships were extracted (correlation analysis by SPSS ver. 29: ** 1% level, * 5% level significant).

From this diagram, we can see that participants who were highly motivated to use what they had learnt in the programme in their educational activities and international exchange programmes after returning to their home countries tended to have a high level of interest in Japan and international exchange to begin with. Furthermore, they tended to be proactive about sharing with their colleagues and felt that they had been able to expand their network with Japanese teachers.

The tendency of the teachers who participated to have a high level of interest in Japan and international exchange is a trend that can be seen across all teachers who participate in programmes like this, and we would think that this trend will not change significantly in the future. On the other hand, "sharing with colleagues" and "network with teachers in Japan" seem to be variables that can be strengthened through the encouragement provided by the programme. Although it is not possible to identify causal relationships from correlation analysis, it appears to be effective to create programmes that promote those elements that could have an impact on their motivation after returning home.

II. Qualitative evaluation based on open-end questions

The theme of the FY2024 programme was "Co-creation of the Vison for Learning and Teaching in the New Era". This theme intended the teachers from different localities to reconsider and co-create "new types of learning" and the "ideal image of teachers in the new era", as a result of which, through the synergy of learning transcending the boundaries of each other's common sense and experience, they would gain new insights that are unobtainable if each of them stay within one's own context. In this section, we will examine the qualitative data to see what kind of insights the teachers gained as a result of the programme, and what kind of changes occurred in their understanding of "new types of learning" and the "ideal image of teachers in the new era".

The data used for analyses are the words of each participated teacher regarding "new learning" and the "ideal image of teachers in the new era". The following outlines the results of content analysis, which extracts keywords from their written responses, and text analysis using an AI text mining tool (User Local: https://wordcloud.userlocal.jp/).

II-1. Teachers from India

Figure 2 and figure 3 show the keywords used by the Indian teachers in expressing their thoughts about new learning and the ideal image of teachers in the new era before and after the programme.

Looking at the changes in the Indian teachers before and after the programme, we identified a couple of key concepts that may represent their ideas of "new learning", such as active and collaborative learning by the learners and learning based on the spirit of inquiry. As for the other topic in the theme "ideal image of teachers in the new era," the Indian teachers referred to the qualities of ideal teachers, such as willingness to learn continuously to improve one's skills and abilities, ability to respond

flexibly to the situation and needs of society and children, and facilitating skills.

The figure below is the word cloud created using the text mining tool based on the written responses of Indian teachers.

[India before participation]

[India_after participation]

learning children new era

sustainable development pbl
facilitator Kuki east work on
based ict accept incorporate learning and
holistic critical thinking ponder
global citizen

Comparing the Indian teachers' understanding of "new learning" and the "ideal image of teachers" before and after the programme, we can see that before participating in the programme they used a good number of key terms from India's national education policy, such as *problem-solving skills, critical thinking* and *social inclusion*. Also, the word cloud above shows the word "learner" in larger letters than the word "educator."

In contrast, after participating in the programme, the word "teacher" appeared in the same size as "children," while some words that did not appear in the pre-programme questionnaire were extracted, including "facilitator" and "global citizen" as presented on the left. This change might have occurred because, having been exposed to the practices of the Japanese host organisations and having interacted with the teachers of those organisations, the way in which the Indian teachers perceived the roles and missions required of them changed, and they recognised the importance for teachers of nurturing children as global citizens and taking the role of facilitator to create better learning opportunities.

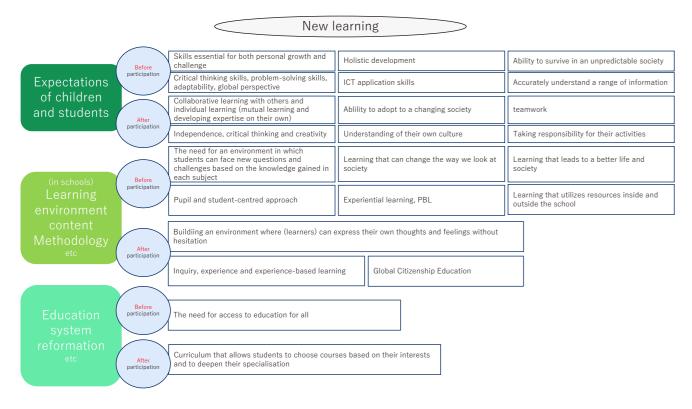

Figure 2. Key words for "new learning" which Indian teachers expressed.

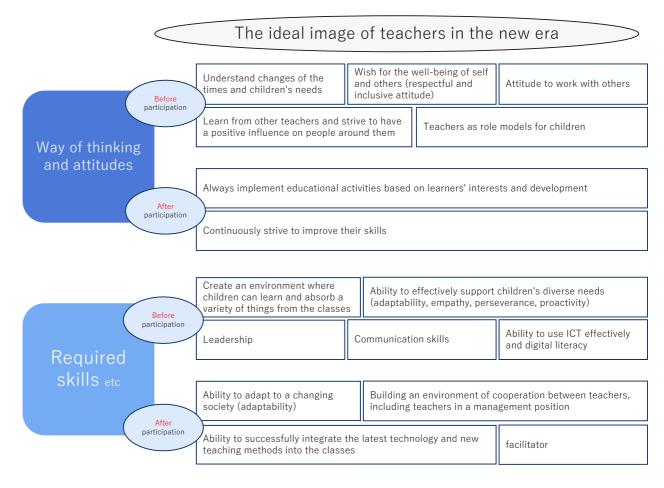

Figure 3. Key words for "ideal image of teachers" which Indian teachers expressed.

20

II-2. Teachers from Thailand

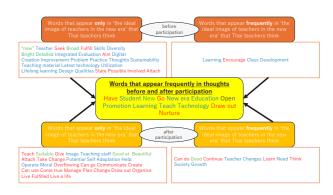

The following figures show the word cloud created using the text mining tool for the written responses of Thai teachers. In the case of Thailand, unlike India, the teachers were asked to respond separately to the questions about "new learning" and the "ideal image of teachers in the new era." In addition, because of the number of words analysed, more detailed analyses were possible with the Thai data than the Indian data.

[Thailand_ideal image of teachers in the new era_before participation]

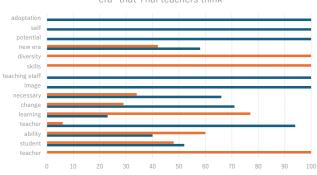

[Thailand_ideal image of teachers in the new era_after participation]

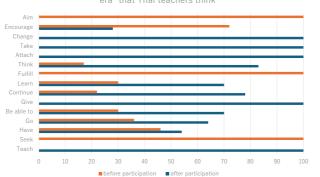

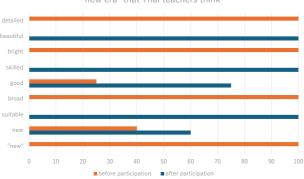

Frequent nouns in "the ideal image of teachers in the new era" that Thai teachers think

Frequent verbs in "the ideal image of teachers in the new

Frequent adjectives in "the ideal image of teachers in the new era" that Thai teachers think

As we focus on the "ideal image of teachers in the new era", before participating in the programme, there were many nouns such as "integration", "evaluation", "improvement", "sustainability", "digital", "latest technology", and "development", but after participating in the programme, there were more verbs such as "change", "communicate", "create", "manage", "plan", "draw out", and "organise". In addition, one of the characteristics is that the words such as "potential" and "help" that did not appear before, as well as "collaboration", which appeared slightly larger.

During the programme in Japan, Thai teachers visited Japanese schools and participated in the process of nurturing children and students as Community Support Staff, Parent-Teacher Association (PTA) and the school discuss the issues of school education and management in cooperation with one another. And they also visited schools with above-average truancy rate, in which they were able to see the support system for each student.

These real experiences in Japanese schools might have provided Thai teachers with opportunities to re-evaluate the ideal image of teachers from the viewpoint of the one who is related to the growth of children as taking all steps necessary to it with others, rather than seeing a teacher as the one that affects teachers themselves only.

III. Summary: Returning to the logic model

The quantitative and qualitative evaluations outlined above have demonstrated that the teachers who participated in the programme have become more interested in exchanges with others, international exchanges in particular and international understanding as well. From such results, this report can conclude that the FY2024 programme successfully contributed to cultivating the qualities to be a Change Maker in the participants. Specifically, the participants were eager to share their experiences in the programme with their colleagues, to apply them to their educational activities, and to launch international exchange programmes at their schools. Such outcomes indicate that this programme has influenced their motivation to take action after returning home.

In addition, looking back the theme for FY2024, "Co-creation of the Vision for New Learning and the Ideal Image of Teachers in the New Era", the following characteristics can be seen in the thoughts of the Indian and Thai teachers after completing the programme:

- Learning that supports children's curiosity and development
- Learning by the whole community
- Promotion of educational activities with teachers as facilitators

- Fostering lifelong learning attitudes in both teachers and learners for responding flexibly to changes in society

As already shown above, they co-created with Japanese teachers their own interpretation of "new learning" and the "ideal image of teachers in the new era" incorporating keywords and concepts that they were not using before the programme.

From the overall results, it can be seen that this programme brought about changes in the participants' views and mindset on education and also represented an opportunity for them to objectively reflect on themselves as teachers and their own teaching practice, thereby nurturing in them the qualities of a *Change Maker*. The concepts of "new learning" and the "ideal image of teachers in the new era" would be updated in the various contexts of the projects, and by continuing the teachers exchange programme and the pursuit of those ideas, it would be possible to create opportunities for more teachers to become *Change Makers*. By using the findings of the survey and analyses to improve the quality of programme contents, and by continuing to implement this programme while working to improve it towards the future, it is expected that this programme will contribute to the achievement of a peaceful and sustainable society where cultural diversity is duly respected.

Questionnaire of the FY2024 programme

#	Questions		
1.	Name		
2.	Name of School/Organisation		
3.	Why did you decide to participate in this programme?		
	Because I was interested in exchange with Japan / Because I was interested in international exchange /		
	Because I was interested in the activities and themes / Because I was recommended by a past participant or other relevant person / Other		
4.	If you selected 'Other' in the above question, please explain about it in detail.		
5.	How did you feel about participating in the programme?		
6.	What is the most impressive activity in the programme?		
7.	Before participating in this programme, how much interest did you have in Japan		
	Options: Very strong / Strong / Relatively strong / Medium / Relatively weak / Weak / Very weak		
8.	After participating in this programme(now), how much interest do you have in Japan?		
	Options: Very strong / Strong / Relatively strong / Medium / Relatively weak / Weak / Very weak		
9.	Before participating in this programme, how much did you know about education in Japan?		
	Options: Very well / Somehow / Average / Not very much / Not at all		
10.	After participating in this programme (now), how much do you know about Japanese education?		
	Options: Very well / Somehow / Average / Not very much / Not at all		
11.	Before participating in this programme, how did you measure the level of your interest in international exchange and education for international		
	understanding?		
	Options: Very strong / Strong / Relatively strong / Medium / Relatively weak / Weak / Very weak		
12.	After participating in this programme (now), how do you measure the level of your interest in international exchange and education for international		
	understanding?		
	Options: Very strong / Strong / Relatively strong / Medium / Relatively weak / Weak / Very weak		
13.	Please consider about the following statements $(13 \cdot \textcircled{1} \sim \textcircled{5})$.		
	13. Through this programme, I feel that I have created or expanded my network with teachers in Japan.		
	Options: Very much agree / Agree / Somewhat agree / Neither agree nor disagree / Somewhat disagree / Disagree / Not at all agree		
	$13 @ Through this programme, I feel that I have created or expanded my network with teachers in my country \\ .$		
	Options: Very much agree / Agree / Somewhatagree / Neither agree nor disagree / Somewhat disagree / Disagree / Not at all agree		
	13-③ I would like to apply what I have learnt in this programme to educational activities and practices.		
	Options: Very much agree / Agree / Somewhat agree / Neither agree nor disagree / Somewhat disagree / Disagree / Not at all agree		
	13-③ I would like to share this experience with my colleagues.		
	Options: Very much agree / Agree / Somewhat agree / Neither agree nor disagree / Somewhat disagree / Disagree / Not at all agree		
	13-⑤ I would like to set up or promote a new international exchange programme at my school/organisation.		
	Options: Very much agree / Agree / Somewhat agree / Neither agree nor disagree / Somewhat disagree / Disagree / Not at all agree		
14.	Reagarding question① to question⑤, which of the question do you feel most strongly about?		
	0 / 2 / 3 / 4 / 5		
15.	Do you think this exchange programme should be continued?		
	Options: Very much agree / Agree / Somewhat agree / Neither agree nor disagree / Somewhat disagree / Disagree / Not at all agree		

Basic Information of Each Programme

1. Dispatch Programme for Teachers in Japan

2024 Invitation Programme for Japanese Teachers

The programme to dispatch Japanese teachers to the Republic of Korea has been implemented since 2003 with the cooperation of MEXT and the United Nations University. Since 2005, the Korean National Commission for UNESCO (KNCU) had been implementing this programme as part of the "UNESCO Japan-South Korea Teachers' Dialogue Programme". This year's programme was implemented on the following dates, as aiming for facilitating dialogue related to challenges between South Korea and Japan in the field of Education, Education for Sustainable Development (ESD), and Global Citizenship Education (GCED).

Day	Date Activities		Venue
1	14th June (Fri.)	Orientation by KNCU (A lecture about the education in the Republic of Korea etc.)	Online
2	29th June (Sat.)	Orientation by ACCU A lecture about the educational situation in the Republic of Korea etc. Mr Mitsuharu TANAKA, Specialist, Overseas Education Research Unit II, Analytical Research Planning Division, Education Policy Bureau, Ministry of Education, Culture, Sports, Science and Technology (MEXT)	Online
3	8th 3 July Pre-departure orientation (Mon.)		Chiba
4	9th July (Tue.)	 Departure from Japan (Narita International Airport) Arrival in South Korea (Gimhae International Airport) Opening ceremony and welcome dinner 	Gyeong sangnam -do
_	10th	[Group A] • Visit to Chilwon High School • Home visit	Gyeong
5	July (Wed.)	[Group B] • Visit to Gimhae Foreign Language High School • Home visit	sangnam -do
6	11th July	[Group A] Visit to Milju Elementary School, Gyeongsangnam-do Office of Education and Upo Ecology Institute	Gyeong sangnam
	(Thu.)	[Group B] Visit to Jijeong Elementary School, Future Education Institute of Gyeongsangnam-do Office of Education and Uiryeong Office of Education	-do

Day	Date	Activities	Venue	
		Visit to N	[Group A] Visit to Masan Sea of Wisdom Library, Happy Village School; Changwon Freedom School, and Changwon Art School	
7	12th July (Fri.)	[Group B] Busan SungWoo School	Gyeong sangnam -do	
	(F11.)	 [Group A and B] Visit to Joseon Tongsinsa History Museum A lecture and joint activities for Korean and Japanese teachers (1) Dinner with Korean teachers 	Busan	
8	13th July (Sat.)	 A lecture and joint activities for Korean and Japanese teachers (2) Farewell Luncheon and Debriefing Meeting 	Busan	
9	14th July (Sun.)	Departure from South Korea (Gimhae International Airport) Arrival in Japan (Narita International Airport)	Chiba	
10	24th August (Fri.)	Follow-up meeting (1)	Online	
11	11th January (Sat.) 2025	Follow-up meeting (2)	Online

2024 Invitation Programme for Japanese Teachers to China

International Exchange Programme between Japan and China has launched as an invitation programme for primary and secondary school teachers from China since 2002. To promote further exchange between both countries, the dispatch programme for the Japanese teachers to China has started since 2003. Accordingly, more than 2,200 Japanese and Chinese teachers altogether have been dispatched from both countries so far. This year, the programme was implemented on the following dates with cooperation of the Ministry of Education of the People's Republic of China in November and December 2024.

Day	Date	Activities	Venue
1	15th November (Fri.)	Orientation A lecture about the educational situation in the People's Republic of China etc. -Mr Satoshi ARAI, Unit Chief, Overseas Education Research Unit II, Analytical Research Planning Division, Education Policy Bureau, Ministry of Education, Culture, Sports, Science and Technology (MEXT)	
2	24th November (Sun.)	Pre-departure orientation	Tokyo
3	25th November (Mon.)	 Departure from Japan (Haneda Airport) Arrival in China (Beijing Capital International Airport) Tour of the Qianmen street Reception 	Beijing
4	26th November (Tue.)	Courtesy visit to the Ministry of Education of the People's Republic of China Visit to Beijing Jingshan School Daxing Experimental School Visit to Temple of Heaven: an Imperial Sacrificial Altar in Beijing	Beijing
5	27th November (Wed.)	 Beijing Capital International Airport→Xi'an Xianyang International Airport Courtesy visit to Xi'an Bureau of Education Visit to Xidan University 	Xi'an
6	28th November (Thu.)	 Visit to the High School Affiliated to Xi'an Jiaotong University Visit to Terracotta Warriors Museum Watching a play "The Romantic Show of Xi'an" 	Xi'an
7	29th November (Fri.)	 Visit to Xi'an No.3 Middle School Xi'an Xianyang International Airport→Beijing Capital International Airport Closing ceremony 	Xi' an Beijing
8	30th November (Sat.)	Departure from China (Beijing Capital International Airport) Arrival in Japan (Haneda Airport)	Tokyo
9	13th December (Fri.)	Follow-up meeting	Online

2024 Thailand-Japan International Educational **Exchange Programme**

As a result of the Thailand-Japan Education Ministerial Meeting in 2017, the Invitation Programme for teachers from Japan by the government of Thailand has started in 2018. This programme has been continued, combining face-to-face and online mode, and this year's programme was implemented on the following dates with the support from the Ministry of Education in Thailand, under the theme of "Educational Transformation for Sustainable Future", which includes the essence of ACCU's theme of the programme: "Pursuit of New Learning and the Ideal Image of Teachers in the New Era".

2. Invitation Programme for Teachers from overseas

Invitation Programme for Teachers from the Republic of Korea

The exchange programme between the Republic of Korea and Japan has the longest history of these programmes, having been implemented since 2001. A total of more than 2,400 teachers from the Republic of Korea have visited Japan, and they have contributed to mutual understanding and promotion of friendship. This year, celebrating 25th anniversary of the exchange programme, 49 primary and secondary school teachers and educational administrators in the Republic of Korea had been invited to Japan. The programme provided the participants with invaluable opportunity to collaborate with teachers in Japan and explore "new learning" and "ideal image of teachers in the new era" under the theme of "Happy Schools"

)ay	Date	Activities	Venue
1	10th January (Fri.) 2025	Orientation A lecture about the educational situation in Japan etc Mr Yusuke HATA, Deputy Director, Office for Education System Reform, Policy Division, Elementary and Secondary Education Bureau, Ministry of Education, Culture, Sports, Science and Technology (MEXT)	Online

Invitation Programme for Teachers from the People's Republic of China

International Exchange Programme between Japan and China has launched as an invitation programme for primary and secondary school teachers from China since 2002. To promote further exchange between both countries, the dispatch programme for the Japanese teachers to China has started since 2003. This year, ACCU had organized the programme in close cooperation with the Ministry of Education, Culture, Sports, Science and Technology of Japan (MEXT), the Ministry of Education of the People's Republic of China, China Education Association for International Exchange (CEAIE) and host schools in Japan. In line with this, we invited 25 primary/secondary teachers and/or educational personnel from China online and face-to-face.

Invitation Programme for Teachers from Thailand

Since this programme started in 2015, teachers from Thailand deepen exchange with teachers, children and students in schools in Japan. Online interactions between Thailand and Japan continued even during the COVID-19 pandemic. This year's 10th Invitation Programme was held under the theme of 'new learning' and 'the qualities required of teachers and educational administrators in the new era'. This programme provided opportunities to discuss the theme and to collaborate on creating new learning through 'learning from different cultures' and 'learning from encounters'.

Invitation Programme for Teachers from India

In 2016, the international exchange programme between India and Japan, called the 'Invitation Programme for Teachers from India', began in close cooperation amongst the Ministry of Education (MoE), Government of India, Centre for Environment Education (CEE) and the Ministry of Education, Culture, Sports, Science and Technology of Japan (MEXT). This year, ACCU had implemented the programme both online and face-to-face, inviting 12 primary and secondary school teachers and education administrators from India.
